MEGA MAN ZX - FIN -

AFTERWORD

Thank you for reading "Mega Man ZX!!"

An especially big thank you to everyone who bought my books!!
The truth is, there are three people behind the name "Shin Ogino."
We use this name to represent all of us when we make a comic.

The only thing left in this second book is the Super Encyclopedia at the end,
and our editor said I could write a few words to put in the book... so here I am!
Starting with volume 1, this series covered 14 chapters. While working on these chapters,
I met a lot of different people... like our first editor, Toshihiro Tsutsumi,
and our second editor, Gou Ueno. Also the designer Daisuke Miyamoto,
for whom I caused much stress... sorry about that!

I also owe a big thanks to everyone who helped me when things got crazy!
Ashihata Tekkoujo, Hakoneko, nacchi, Samehiko Murano... you guys are life savers!!
Of course, I couldn't have done any of this without the people from the companies who
created the game, made sure I had all the reference materials I needed, and took the time
to check my work. Thank you so much, Capcom and Inti Creates!! Your games are awesome!

Last but certainly not least, I have to give proper thanks to all of my
readers for supporting me throughout this process! Thank you all very
much!! I look forward to the day when we will cross paths again!

**UNTIL NEXT TIME! BYE BYE BYE
(THAT'S THREE PEOPLE'S WORTH)!!**
